EDUCATION

University of Toronto

Bachelor of Applied Science, Engineering Science

Sep. 2025 - May 2030

Toronto, ON

EXPERIENCE

Student Researcher at UTIAS (Flight Systems + Control Lab)

May 2025 – Present

University of Toronto Institute for Aerospace Studies

Toronto, ON

- Collaborated with MSc Kevin Chen at UTIAS on **advancing neural contraction metrics** for quadrotor with slung payload
- Designed and implemented PyTorch models to certify **stability via learned contraction metrics**
- Derived **Jacobians and stability proofs** to extend contraction analysis to quadrotor-payload dynamics

Bishop Strachan Rocketry Team

Sep. 2023 – Aug 2025

The Bishop Strachan School

Toronto, ON

- Lead 14-member avionics subteam; **engineered custom flight computers and pyrotechnic systems** for two supersonic rockets competing at Launch Canada 2025
- Co-led telemetry (ground control) and established collaborations with university rocketry teams for SRAD avionics guidance
- Outsourced all hardware and lead rigorous prototyping process with documentation
- Team became the first high school team to compete at Launch Canada

Split Elements Boutique

Sep. 2023 – May 2024

Virtual

- Developed blockchain ticketing system features by streamlining backend API endpoints in Next.js and building front-end request interfaces in React + Tailwind

Eclipse Expositions

Oct. 2023 – Aug 2024

Hybrid

Waterloo, KW

- Collaborated and developed authentication and dashboard page for a **1000+ student conference platform** using Next.js, TypeScript, and Tailwind

PROJECTS

Stochastic Neural Contraction Metrics Paper | *PyTorch, Control Theory*

June 2025 – Present

- Wrote a paper on an unguided learning approach to deriving contraction metrics for a stochastic pendulum system, to be extended to quadrotor dynamics
- Coded a neural network using PyTorch for metric formulation
- Coded a CCM loop utilizing the derived contraction metric to exponentially decrease stability curve

VRC Competition Robot | *Fusion360, C++*

Sept 2021 – June 2026

- Captain of 5298C VRC Team, head programmer, designer and driver
- Lead 8-member team in designing and engineering an award-winning robot, qualified for provincials
- Modelled robot prototypes in Fusion360 prior to implementation

Personal Website | *NextJS, Tailwind, PostgreSQL, HTML, CSS*

May 2018 – May 2020

- Developed a personal website to showcase personal projects and updates

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Frameworks: Next, React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, Google Cloud Platform, VSCode, Visual Studio, PyCharm, Eclipse

Libraries: pandas, NumPy, Matplotlib, PyTorch
